If the SMALL ENTITY is shown as YES, verify your current SMALL ENTITY status:

A. If the status is the same, pay the TOTAL FEE(S) DUE shown above.

DETAILED ACTION

1. A response was received on 31 July 2009. By this response, Claims 1, 5, 15, 17, and 57 have been amended. No claims have been added or canceled. Claims 1-3, 5, 7-11, 15-22, and 57 are currently pending in the present application.

Allowable Subject Matter

2. Claims 1-3, 5, 7-11, 15-22, and 57 are allowed.
3. The following is an examiner's statement of reasons for allowance:

Independent Claim 57 is directed to a data processing method that performs rights management for encrypted content data that includes receiving from a content provider a secure container including a content file having the encrypted content data, a signature of the content provider, and a key file including an encrypted content key, usage control policy data, and a signature of an electronic distribution center; receiving license key data from the electronic distribution center; determining a purchase mode or a usage mode of the content data based on a handling policy; creating log data that includes a unique identifier, discount information, and tracing information and transmitting the log data to the electronic distribution center; creating usage control status data, which includes a content identifier, the purchase mode, an identifier for a tamper-resistant circuit module, and a user identifier, based on the determined purchase mode; monitoring and controlling the usage control policy and status data to

ensure the content data is purchased and used as restricted by the policy and status data; recording the content data; generating hash values of the content data, the content key, and the usage control policy; creating a signature of a data processing apparatus using the hash values; verifying integrity of the signatures of the content provider and electronic distribution center; performing authentication and sharing a session key obtained by the authentication; and encrypting the content key and the usage control status data using the session key. Independent Claims 1 and 17 are directed to data processing apparatus that perform functionality corresponding to that of the method of Claim 57, and also include further structural limitations including first and second buses, an interface circuit between the buses, an external bus interface circuit, and an arithmetic processing circuit, *inter alia*, and further recite additional functionality of the arithmetic processing circuit.

The closest prior art, Christiano, Stefik, and Peinado, disclose a similar method as that recited in Claim 57, that includes determining a usage or purchase mode based on a usage license policy; creating and transmitting log data; creating usage control status data; monitoring usage control policy and status data and controlling use of content data; recording the content data; performing authentication; encrypting key and control data; performing authentication and sharing a session key; and generating hash values and creating and verifying signature data, *inter alia*. Additional cited prior art, Schneier, discloses the structures of the tamper-resistant circuit module and corresponding functionality. However, none of the cited prior art, alone or in combination, teaches or suggests the receipt of a secure container from a content

provider and the receipt of a license key from an electronic distribution center, where the container includes a content file, a key file, and a signature of the content provider, and where the content file contains encrypted content data and the key file contains the content key, encrypted with the license key, and also includes usage control policy data and a signature of the electronic distribution center, in combination with the other limitations as claimed. Therefore, the claims are allowable over the cited prior art.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
